

Issue: MN Education

Education: 4 Sentence Overview

Education

4 Sentence Overview

Minnesota house Republicans have repeatedly supported bills that do not adequately fund K-12 and higher education, proposed diverting money from public schools, and opposed state partnerships with universities. Their agenda has been to cut taxes and appropriate funds for education from other programs without a plan for future sources of revenue. Minnesota needs legislators that work together for the benefit of their constituents. An educated populace is key to job growth and a healthy economy.
